

SPINCLABS SOLUTIONS FOR SMART PLANET

# *Transform Logistics operations with our Mobility Solutions*

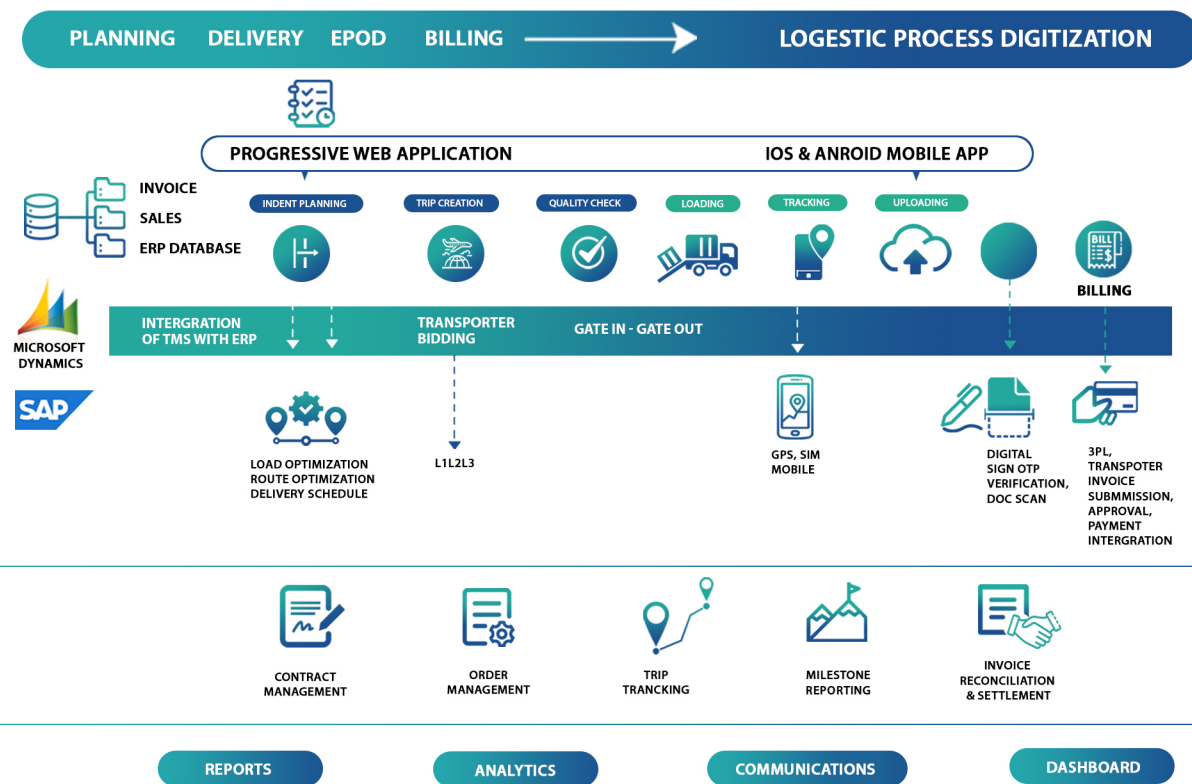

23<sup>RD</sup> February 2024

## Transform Logistics operations with our Mobility Solutions

In today's dynamic business environment, digitalization is imperative for staying competitive. The logistics sector is embracing this trend with Transport Management Systems (TMS), enabling automation, process streamlining, and efficient inventory management.

# Logistics Digitization System

## Key Features of Our Logistics Digitization Solution:

### Centralized Logistics Data

Streamline operations by centralizing logistics data.

### Visibility on Logistics Data

Gain real-time visibility into logistics operations.

### Tracking and Monitoring

Track and monitor logistics operations efficiently.

### Billing Management

Simplify billing processes for transporters.

Spinclabs redefines logistics through advanced reporting, sustainability focus, and predictive analytics, empowering users to make informed decisions at every operational stage.

## ANALYTICS

Employ cutting-edge reporting capabilities to derive actionable insights, ensure expeditious data processing through an integrated market-rate index and memory database, and achieve real-time reporting across pivotal TMS objects.

- ▶ Granular view for carbon footprint reduction.
- ▶ Track and optimize the full shipment lifecycle in terms of carbon cost to reduce the environmental impact.
- ▶ Optimize routes, reduce unnecessary mileage, and meet sustainability goals.
- ▶ Simplified carrier selection based on performance metrics.
- ▶ Automated carrier scorecards for informed decisions.
- ▶ Predictive ETA for proactive decision making.
- ▶ Advanced business intelligence solutions for improvement opportunities

## INTEGRATION

- ▶ Seamlessly connect essential components of the logistics ecosystem.
- ▶ ERP integrations for efficient planning, checking freight charges, and optimizing routes.
- ▶ GPS Fleet Management integration for real-time insights into vehicle location and status.
- ▶ Billing Software Integration for automated billing and invoicing.

## PLANNING

- ▶ Convert manual vehicle indent allocation into a smarter process.
- ▶ Increase efficiency and accountability of logistics planner teams.
- ▶ Integrate data for informed load selection and transporter placement.

Spinclabs redefines logistics through advanced reporting, sustainability focus, and predictive analytics, empowering users to make informed decisions at every operational stage.

### SETTLEMENT

- ▶ Streamline freight settlement processes with API-driven, integrated solutions.
- ▶ Achieve billing efficiency and cost savings.
- ▶ Simplify claim management and billing approvals.

### TRACKING

- ▶ Utilize advanced GPS devices and SIM tracking for accurate and real-time tracking.
- ▶ Monitor location, movement, and important alerts for efficient asset tracking.

### VISIBILITY

- ▶ Transform transportation management with comprehensive insights.
- ▶ Control Tower for real-time oversight.
- ▶ Shipper Dashboard for centralized visibility.
- ▶ Customer and Transporter Portals for user-friendly interfaces.

Spinclabs revolutionizes logistics with innovation, empowering users to make smarter decisions. Choose Spinclabs for a new era of efficiency, control, and precision in every aspect of your logistics ecosystem.

**SPINCLABS**  
SOLUTIONS FOR SMART PLANET

Spinclabs consults and implements cloud enabled software solutions for digitization of supply chain, logistics & Transportation. We are also into digitization of the indoor spaces ,provide Map based IoT solutions and real time monitoring solution.
